MUHAMMAD ANAS

Front End Web Developer

📞 0314 2362310 @ muhammad-anas16@outlook.com 🔗 LinkedIn/Portfolio 📍 36/G Landhi, Karachi, Pakistan

SUMMARY

Motivated and curious front-end developer currently diving deep into full-stack web development with the MERN stack. I've built responsive websites using HTML, CSS, JavaScript, and React, and I'm now learning how to create powerful back-end systems with Node.js, Express, and MongoDB. I enjoy solving problems, writing clean code, and constantly improving through hands-on projects. I'm excited to join a team where I can learn, contribute, and grow while building real-world web applications.

EXPERIENCE

MERN Stack Developer (Self-Directed Projects)

Self-Employed

📅 09/2024 - Present   📍 Remote

Actively learning and applying full-stack web development skills as a MERN stack student by building real-world applications and practicing both front-end and back-end technologies.

- **Full-stack web Developing applications** using the MERN stack (MongoDB, Express.js, React, Node.js) as part of ongoing training and personal projects

- **Built RESTful APIs** and implemented CRUD operations using Node.js, Express, and MongoDB in practice projects

- **Created responsive user interfaces** with React and connected them to back-end services

- **Using Git and GitHub** to manage code, track progress, and collaborate on development tasks

- **Implemented features like authentication, routing, and state management** in React-based projects

- **Actively building skills** through a structured MERN stack course, hands-on coding, and real-world challenges

KEY ACHIEVEMENTS

💎 **Built and deployed responsive front-end projects using HTML, CSS, JavaScript, and React as part of a structured MERN Stack development course**

Developed interactive user interfaces with React, integrating tools like React Router for smooth client-side navigation. Built and deployed a personal portfolio website to showcase projects and skills. Practiced version control using Git and GitHub for effective project tracking and collaboration. Currently expanding back-end knowledge by building servers with Node.js and Express, and beginning to work with MongoDB for database integration in full-stack applications.

SKILLS

HTML   CSS   JavaScript   React

Redux   Git   GitHub

Collaborative Workflows   Node.js

Express.js   MongoDB
